James: Last May, you wrote the e-mail below exempting from Mexican coordination the application of Station KSMV-LP, Los Angeles, California, for use of Channel 23. The basis was that Channel 23 had been coordinated for Station KTBN on the digital table of allotments. KTBN has, subsequently, changed its output channel.

We now have another request before the MB for use of Channel 23. This is the above-referenced STA request of Station KSGA-LP, San Bernardino, California. In that the KSGA-LP request is, obviously, for a different transmitter site than the one proposed by KSMV-LP, the MB wants to be certain that the exemption you provided would apply equally to the KSGA-LP proposal.

I appreciate your consideration of this request.

Matt:

Since the above application will use the vacated full-service digital channel for KTBN on channel 23, it does not need coordination with Mexico. IB would have no objection to its grant.

Thanks,

James

Jim: In regard to this matter, and Matt Urick's note below, is Mexican coordination really required where we already have two U.S. stations in California (KTBN, Santa Ana, CA, and KVMD, Twentynine Palms, CA, already authorized to transmit, on a full-service basis, on digital on Channel 23? It doesn't seem to make sense.

As an added bonus, it requires international bureau approval due to its proximity to Mexico, which could take several months. For digital LPTV, the criteria for referral is all applications within 275 km of the US-Mexico border, and this one is 207.5 km.

Barry:
It's probably because the app is dismissed. Actually, I'm not even sure how that last amendment got in there because it was dismissed at that time. In order to get the amendment filed, we need to first get the petition for reconsideration granted, which I can talk to someone about.

[Matt: We are preparing an amendment to the application. According to Byron St. Clair's office, the tower owner modified the tower registration at the same time we were filing the amendment.](#)

We have discovered a problem in preparing the filing. The CDBS system will not accept an amendment to a dismissed application. Can I file the amendment on paper and deliver it to you? Or, is there some other workaround for this issue.

Thank you.

Barry:
The antenna measurements are off again. They should correspond to what is in the ASRN database for 1013889, or else I need an explanation as to why they are different. Here is what is in the ASRN database for that antenna, and the corresponding value in cdbS.

Elevation of Site Above Mean Sea Level (6. Antenna Location Site Elevation Above Mean Sea Level)

1741.3

Overall Height Above Ground (AGL) (7. Overall tower height above ground)
99.1

I just talked to Hossein about it and here is what we decided: I can run the amendment through engineering review like a regular amendment, and if it is OK, we can accept the petition for recon, and then reinstate and grant the app. It may take a few days because the amendment has to be accepted in cdb's and then entered into the interference database. But once that is done, I can process it fairly quickly. If the interference problem has been fixed, then it will go through fine.

Subject: Status Check on File No. BDUSDTL-20081022ABW, Station KSMV-LP (FIN: 14002)

Hossein: At the beginning of April, we filed a reconsideration request and amendment for the above-referenced uncontested application. It was one where Byron St. Clair inadvertently failed to submit an amendment in response to a 30-day letter. The problem was Byron's error and not the underlying engineering issue.

Can I find out the current status?

Thank you.
