Re: University of Rochester Broadcast Corp.
WRUR-FM, Rochester, New York
Facility Identification Number: 69138
Special Temporary Authority

Dear Ms. Algier:

This is in reference to the request filed July 22, 2010, on behalf of University of Rochester Broadcast Corp. ("URBC"). URBC requests extension of the special temporary authority ("STA") granted on January 29, 2010, to operate Station WRUR-FM with temporary facilities.¹ In support of the request, URBC states that has experienced delays in construction of modified facilities for the station. URBC seeks extension of STA to allow time for completion of construction.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that Constructon Permit BMPED-20070907AAV expired on July 23, 2010; however, Application BPED-20100722BMK, for a replacement permit, is pending. Thus, the

¹ WRUR-FM is licensed for operation on Channel 203A (88.5 MHz) with effective radiated power ("ERP") of 3 kilowatts (H&V) and antenna height above average terrain ("HAAT") of 106 meters. Application BPED-20100722BMK proposes relocation of the transmitter, an upgrade to Class B1, an increase in HAAT to 115 meters and an increase in ERP to 15.1 kilowatts (Max-DA, H&V).

licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem, and extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WRUR-FM may continue to operate with the following facilities:

Geographic coordinates:	43° 8' 7" N, 77° 35' 3" W (NAD 1927)
Channel	203 (88.5 MHz)
Effective radiated power:	3 kilowatts (H&V)
Antenna height:	
above ground:	52 meters
above mean sea level:	257 meters
Above average terrain:	109 meters

It is anticipated that an application for license to cover the permit will be filed prior to the expiration date below. URBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **February 13, 2011**.

Sincerely,

Charles N. Miller, Engineer
