Digital Radio Notification  
445 12th Street SW. Room 2-B450  
Washington D.C. 20554

Dear Sir/ Madam,

Per guidance provided in MM Docket No. 99-325, this instrument serves to notify you that on Wednesday August 11, 2010 WTJB FM has increased the power level of it's hybrid digital emissions to -14bdc.

I certify that except for the digital ERP, our IBOC facilities conform to the iBiquity specifications. In the event of interference, please contact me as technical representative at 334-372-3721, 334-670-3268, or [jbrunson@troy.edu](mailto:jbrunson@troy.edu). Currently, our combined analog and digital transmitter power output is 1414.4 watts. Our analog ERP is 5000 watts and our digital ERP is 200 watts. I further certify that the notified operation will not cause human exposure to levels of radio-frequency radiation in excess of the limits in section 1.1310 of the FCC rules and is therefore categorically excluded from any environmental processing pursuant to Section 1.1306(b) of the commission's rules. We employ the common amplification method of transmission therefore WTJB does not use an auxiliary antenna for IBOC emissions.

Sincerely,

A handwritten signature in black ink, appearing to read "John Brunson".

John Brunson

Chief Operator WTJB-FM
