Re: NM Licensing LLC
WSGW-FM, Carrollton, Michigan
Facility Identification Number: 41842
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed August 12, 2010, on behalf of NM Licensing LLC ("NML"). NML requests extension of the special temporary authority ("STA") granted on May 12, 2010, to operate Station WSGW-FM with temporary facilities.¹ In support of the request, NML states that it has tested the newly-licensed WSGW-FM facilities and has discovered that the new facilities are incapable of serving significant areas in the southern portion of the station's service area. NML requests extension of STA to operate with its formerly licensed facilities while its engineers redesign the station's antenna system.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

¹ WSGW-FM is licensed for operation on Channel 263A (100.5 MHz) with effective radiated power of 6 kilowatts (Max-DA, H&V) and antenna height above average terrain of 100 meters.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WSGW-FM may continue to operate with the following facilities:

Geographic coordinates:	43° 33' 42" N, 83° 58' 52" W (NAD 1927)
Channel	263 (100.5 MHz)
Effective radiated power:	3 kilowatts (H&V)
Antenna height:	
above ground:	102 meters
above mean sea level:	285 meters
Above average terrain:	100 meters

NML must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **February 27, 2011**.

Sincerely,

Charles N. Miller, Engineer
