BDISDTL-20090729AFD

Dear Applicant:

On September 14, 2009, the licensee as addressed above was sent a 30 day deficiency letter outlining the following interference problems:

Our preliminary engineering review reveals that your proposed facility does not comply with the Commission's interference rules. Specifically, the proposal is predicted to cause interference to the following facilities:

KTFB-CA BDISDTA-20070611AKQ CH 16 Bakersfield, CA.

You were given the opportunity to file a minor amendment to resolve these specified problems within (30) days from the date of that letter. Your amendment must be filed electronically. If not so amended, your application will be considered incomplete and subsequently dismissed.

Our records show that no amendment has been filed as of September 14, 2010, to resolve the above referenced interference problems. In addition, our current interference analysis shows the same interference issues still exist as outlined in the above letter.

Further review shows that you have filed a second displacement application BDISDTL-20100729ADT which supersedes the above referenced displacement application. You can not have two displacement applications pending at the same time; therefore, based on the ongoing interference problems and the filing of a second pending displacement application the above referenced displacement application BDISDTL-20090729AFD **IS HEREBY DISMISSED.**

Sincerely,

Hossein Hashemzadeh
