Re: Bonneville Holding Company
KMVP (AM), Phoenix, Arizona
Facility Identification Number: 1326
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed October 20, 2010, on behalf of Bonneville Holding Company ("BHC"). BHC requests extension of the special temporary authority ("STA") granted on April 29, 2010, to operate Station KMVP pursuant to Section 73.1615.¹ In support of the request, BHC states that it has completed construction of modified KMVP facilities as authorized by Construction Permit BP-20080415AAS and that its Application BMML-20100723AVO, for license to cover the permit, is pending.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoring licensed operation; thus, extension of STA is warranted. The STA is modified based on the information provided.

¹ KMVP is licensed for operation on 860 kHz with 1 kilowatt daytime and 1 kilowatt nighttime, employing a directional antenna during nighttime hours only (DA-N-U). Construction Permit BP-20080415AAS authorizes relocation of the transmitter, a reduction in daytime power to 0.94 kilowatt, and changes to the nighttime directional pattern.

Accordingly, the request for extension of STA IS HEREBY GRANTED, with modification as discussed above. Station KMVP may continue to operate with the daytime nondirectional antenna system and the substantially adjusted nighttime directional pattern authorized by Construction Permit BP-20080415AAS. Nighttime operating parameters shall be maintained within $\pm 5\%$ current ratio and $\pm 3^\circ$ phase of the parameters specified in License Application BMML-20100723AVO. It will be necessary to reduce power or cease operation if complaints of interference are received. BHC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **May 3, 2011**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.
