Dear Applicant:

This letter refers to the above-captioned application for an original construction permit.

An engineering study has revealed a discrepancy with the coordinates and the site elevation above mean sea level ("AMSL") compared to that on the tower registration record. The application indicates the site coordinates of 33° 18' 22" N and 85° 44' 42" W (NAD 27) and a derived site elevation of 97 meters AMSL. However, the tower registration record (# 1209414) specifies coordinates of 33° 19' 37" N and 85° 41' 31" W (NAD 27) and a site elevation of 324 meters AMSL. These discrepancies must be eliminated. A curative amendment to the application correcting these discrepancies must be submitted so that processing of the application may be completed.

Further action on the subject application will be withheld for a period of 20 days from the date of this letter to provide B. Jordan Communications Corporation an opportunity to respond. Failure to respond within this time period will result in the dismissal of the application pursuant to 47 C.F.R. § 73.3568(a). Please note, that any amendment must be submitted in the same manner as the original application.

Sincerely,

*Edna V. Prado*
