In re: K262BP, Conner, CA
BPFT-20100729ABD
Facility ID # 144609

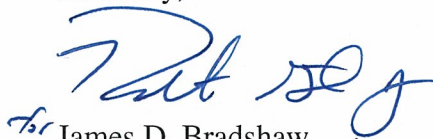

Dear Applicant:

This refers to: (1) the above-captioned application for K262BP, Conner, California.

An engineering study has revealed the application violates 47 C.F.R. § 74.1204(a) with respect to KMQA(FM), East Port, California (BLED-20080103ABT). Section 74.1204(a) states that an application for a FM translator station will not be accepted if the proposed operation would involve prohibited overlap of predicted field strength contours with any other authorized station. The proposed 48 dBu interference contour overlaps with the 54 dBu protected contour of KMQA(FM).

In light of the above, the application BPFT-20100729ABD filed by Juan Alberto Ayala is unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283.

Sincerely,

James D. Bradshaw
Deputy Chief
Audio Division
Media Bureau

CC: Dan Alpert

No topographic data is available for this location.
A1 - Number of radials where free space equation was used for field strength calculations.
A7 - Number of radials where a HAAT less than 30 meters was adjusted to 30 meters.
