In re: L&D Broadcasters, Inc.
WGNZ(AM), Fairborn, Ohio
Facility Identification Number: 36075
Application: BMP-20101001ACC

Dear Mr. Neely:

This is in reference to the above-captioned minor change application filed by L&D Broadcasters, Inc. (L&D), licensee of station WGNZ(AM) to modify Construction Permit BP-20060620ABF by augmenting the daytime, nighttime, and critical hours patterns.

A preliminary review of the application indicates that the nighttime pattern 275° bearing augmented value of 15.7 mV/m is less than the standard pattern value of 18.4 mV/m, resulting in negative augmentation, in violation of Section 73.152(d)(2) of the Commission's rules. In addition, the tower registration records must be corrected due to a change in overall height of the first and third towers. For more information see the WTB tower registration web page (<http://wireless.fcc.gov/antenna>).

Further action on the subject application will be withheld for the thirty (30) days to allow L&D time to amend to resolve all problems. Failure to respond or amend will result in the dismissal of the application pursuant to Section 73.3568 of the Commission's rules.

Sincerely,

Son Nguyen
Supervisory Engineer
