**Subject:** K26FA

There is a typographical error in the azimuth of the antenna orientation in the K26FA STA request I filed last week. The Longley-Rice study was done correctly, but there is a one-digit typo on the STA form itself. The form says 220 degrees. The correct azimuth is 200 degrees.

I am putting together a corrected version and will e-mail it to you as soon as we can get the scanner to behave properly.

Peter
