Re: Urban Radio III, Inc.

KVVN (AM), Santa Clara, California Facility Identification Number: 28438

Special Temporary Authority

## Dear Counsel:

This is in reference to the request filed December 27, 2010, on behalf of Urban Radio III, Inc. ("UR3"). UR3 requests modification of the special temporary authority ("STA") originally granted on January 27, 2010, to operate Station KVVN with parameters at variance and/or reduced power while maintaining monitor points within licensed limits and with a nondirectional antenna and reduced power. In support of the request, UR3 states that it has completed repairs to the station's ground system which was damaged by vandals, and that it is preparing to perform computer modeling and sample system measurements in order to relicense Station KVVN under the Method of Moments ("MOM") proofing procedures described in Section 73.151(c).

Our review indicates that, due to the derivation of new operating parameters via MOM analysis, neither the currently licensed antenna monitor readings nor the licensed monitor point field strength limits will necessarily be applicable to the proposed STA operation with MOM-derived parameters. STA will be granted as requested.

Accordingly, the request for modification of STA IS HEREBY GRANTED. Station KVVN may continue to operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. Operation with a temporary nondirectional antenna and reduced power not to exceed 0.25 kilowatt daytime and 0.625 kilowatt nighttime also is authorized, only as necessary to facilitate the repair work. Following completion of necessary measurements and adjustments, Station KVVN may operate with its substantially adjusted daytime and nighttime directional patterns pending the preparation, filing and processing of an application for license pursuant to Section 73.151(c). During this mode of operation, operating parameters shall be maintained within  $\pm$  5% current ratios and  $\pm$  3° phase of the MOM-derived parameters, which shall be posted with the station license along with a copy of this letter. It will be necessary to

<sup>&</sup>lt;sup>1</sup> KVVN is licensed for operation on 1430 kHz with 1 kilowatt daytime and 2.5 kilowatts nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

further reduce power or cease operation if complaints of interference are received. UR3 must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on July 3, 2011.

Sincerely,

Charles N. Miller, Engineer

Audio Division Media Bureau
