Re: Oregon Public Broadcasting  
K219FJ (FX), Gleneden Beach, Oregon  
Facility Identification Number: 50615  
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed November 19, 2010, on behalf of Oregon Public Broadcasting ("UPB"). UPB requests further extension of the special temporary authority ("STA") granted on May 12, 2009, to operate FM Translator K219FJ with temporary facilities.<sup>1</sup> In support of the request, UPB states that it continues to evaluate a move of the translator, that it has done considerable engineering and site survey work, but that it cannot complete its planning until a group of mutually exclusive applications covering an extensive part of the area is resolved.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

---

<sup>1</sup> K219FJ is licensed for operation on Channel 219D (91.7 MHz) with effective radiated power of 0.205 kilowatt (H&V) and antenna height above average terrain of 20 meters.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station K219FJ may continue to operate with the following facilities:

Geographic coordinates:	44° 53' 8" N, 124° 0' 51" W (NAD 1927)
Channel	219 (91.7 MHz)
Effective radiated power:	0.012 kilowatt (H&V)
Antenna height:	
above ground:	9 meters
above mean sea level:	96 meters
Above average terrain:	5 meters

UPB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **July 5, 2011**.

Sincerely,

Charles N. Miller, Engineer
