Re: Diamond Broadcasting
KRJY (AM), Sacramento, California
Facility Identification Number: 29297
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed December 2, 2010, on behalf of Diamond Broadcasting ("DB"). DB requests extension of the special temporary authority ("STA") granted on June 8, 2010, to operate Station KRJY with temporary facilities.¹ In support of the request, DB states that a dispute with the owner of the licensed site is in litigation.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KRJY may continue to operate with the following facilities:

Transmitter site:	3825 Gregory Ave., West Sacramento, CA
Geographic coordinates:	38° 31' 43" N, 121° 33' 14" W (NAD 1927)
Frequency:	1240 KHz
Hours of operation:	Unlimited

¹ KRJY is licensed for operation on 1240 kHz with 1 kilowatt daytime and 1 kilowatt nighttime, employing a nondirectional antenna (ND-1-U).

Operating power: 0.25 kW
Antenna type: Horizontal wire
Antenna efficiency: 240 mV/m/km/kW
Overall height: 6 meters

It will be necessary to further reduce power or cease operation if complaints of interference are received. It is anticipated that an application for construction permit will be filed prior to the expiration date below. DB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **July 14, 2011**.

Sincerely,

Charles N. Miller, Engineer
