Re: CBS Radio Stations, Inc.
WTIC (AM), Hartford, Connecticut
Facility Identification Number: 66464
Special Temporary Authority

Dear Mr. Benedict:

This is in reference to the request filed December 2, 2010, on behalf of CBS Radio Stations, Inc. ("CBS"). CBS requests further extension of the special temporary authority ("STA") granted on May 22, 2009, and modified on November 12, 2009, to operate Station WTIC with parameters at variance from the station license.¹ In support of the request, CBS states that it has completed conversion of the station's nighttime directional antenna system to Method of Moments ("MOM") parameters and that its application for license is on file.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoring licensed operation. Thus, extension of STA is warranted. The STA is modified based on the information provided in the request.

Accordingly, the request for extension of STA IS HEREBY GRANTED, with modifications discussed above. Station WTIC may continue to operate with its substantially adjusted nighttime directional antenna system pending the processing of Application BMML-20102227BHX, for modification of license supported by a MOM proof of performance pursuant to 47 C.F.R. Section

¹ WTIC is licensed for operation on 1080 kHz with 50 kilowatts daytime and 50 kilowatts nighttime, employing a directional antenna during nighttime hours only (DA-N-U).

73.151(c).² It will be necessary to reduce power or cease operation if complaints of interference are received. MCC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **July 11, 2011**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with a long horizontal stroke at the end.

Charles N. Miller, Engineer
Audio Division
Media Bureau

cc: CBS Radio Stations, Inc.

² In this mode of operation, operating parameters shall be maintained within $\pm 5\%$ current ratios and $\pm 3^\circ$ phase of the model-derived operating parameters, which must be posted with the station's license along with a copy of this STA letter.
