Re: 550 AM Inc,  
WASG(AM), Daphne, AL  
Facility Identification Number: 51141  
Construction Permit: BMJP-20051031AGW  
License Application: BL-20101126ABD  
Program Test Authority ("PTA")

Dear Mr. Tillotson:

This is in reference to the above-captioned license application of 550 AM Inc. ("550") and to program test authority for station WASG(AM), Daphne, Alabama.

Authority is granted WASG(AM) to conduct daytime and nighttime program tests in accordance with Construction Permit BMJP-20051031AGW and 47 C.F.R. § 73.1620 to operate on 540 kHz with a nominal daytime power of 2.5 kilowatts and a nominal nighttime power of 19 watts. Program tests are authorized with a daytime antenna input power of 2.5 kilowatts (antenna current 17.56 amperes) and a nighttime antenna input power of 19 watts (antenna current of 1.53 amperes).

A preliminary study of the application reveals that condition #2 of the construction permit was not fulfilled in that a signed agreement between the two co-located stations, WASG(AM) and WIJD(AM), setting forth the responsibilities of each in the maintenance and repair of the combining equipment was not included in the application.<sup>1</sup> In addition, the study reveals that 550 did not submit the family of curves used to analyze the WASG(AM) non-directional measurement data in the application.

Accordingly, further action on the subject application will be withheld for thirty (30) days from the date of this letter in order to provide 550 an opportunity to file a curative amendment. Failure to respond or file an amendment within this time period will result

---

<sup>1</sup> 550 states that the agreement was attached to the application; however, it wasn't.

in the termination of program tests and the dismissal of the application pursuant to 47 C.F.R. § 73.3568.

Sincerely,

Son Nguyen
