Re: WRNE(AM), Gulf Breeze, Florida
Facility Identification Number: 41010
Media One Communications, Inc.
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed July 17, 2008¹, on behalf of Media One Communications, Inc. (MOC). MOC requests further extension of the special temporary authority (STA) granted on February 14, 2007, to operate Station WRNE with emergency antenna facilities due to the destruction of one of its towers by a hurricane.² In support of the request, MOC states that completion of reconstruction has been delayed by various causes, including adverse weather conditions and significant and continuing medical expenses.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

¹ Processing of the request was delayed by a fee issue which now has been resolved.

² WRNE is licensed (BL-20050210AWZ) for operation on 980 kHz with 4 kilowatts daytime and 1 kilowatt nighttime, employing a directional antenna during nighttime hours only (DA-N-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WRNE may operate during nighttime hours with an emergency nondirectional antenna and reduced power not to exceed 0.25 kilowatt. It will be necessary to further reduce power or cease operation if complaints of interference are received. MOC must notify the Commission when licensed operation is restored. MOC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **August 2, 2011**.

Sincerely,

A handwritten signature in blue ink that reads "Charles N. Miller". The signature is fluid and cursive, with the first name "Charles" being the most prominent part.
