In re: Low Power Television Application of:
Peter N. Cuenca,
DBA Cuenca Enterprises
Channel 45, Boston, MA.
File no.: BMPDTL-20101209AJB
Facility Id No.: 168497

Dear Applicant:

We are currently processing your above-referenced application which is a proposal to modify your existing digital companion channel facility BDCCDTL-20081212ACG as granted on February 20, 2009. Our preliminary engineering review reveals that you have filed a second application for a digital facility BDISDTL-20101209AJA.

According to the Commission's rules, any station that has a license, existing digital construction permit or in this case a existing digital companion channel construction permit, the station will not be eligible to submit a digital flash cut or digital displacement application for the same station.

You are hereby given the opportunity to file a minor amendment to resolve the specified double proposed digital facilities within 30 days from the date of this letter. Amendments must be filed electronically and it must clearly indicate which facility you want to continue to pursue as you digital facility for the station.

You have the option to continue your proposed companion channel facility by requesting to have the digital displacement application as referenced above dismissed or you can elect to continue with your proposed digital displacement facility by requesting that the above referenced modification to the existing companion channel construction permit be dismissed and that the construction permit for the existing companion channel be cancelled.

If not so amended, we will dismiss the newest proposed digital displacement construction permit BDISDTL-20101209AJA.

Sincerely

Hossein Hashemzadeh
Deputy Chief
Video Division
Media Bureau
