Re: GB Enterprises Communications Corporation
WHNR (AM), Cypress Gardens, Florida
Facility Identification Number: 21766
Special Temporary Authority

Dear Ms. Perez:

This is in reference to the request filed November 10, 2010¹, on behalf of GB Enterprises Communications Corporation ("GBECC"). GBECC requests extension of the special temporary authority ("STA") granted on May 18, 2010, to operate Station WHNR with emergency antenna facilities pursuant to Section 73.1680.² In support of the request, GBECC states that one of the station's towers has collapsed, and that it is working with its consulting engineer to design a directional pattern using the remaining towers.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

¹ Processing of the request was delayed by a fee issue which now has been resolved.

² WHNR is licensed for operation on 1360 kHz with 5 kilowatts daytime and 2.5 kilowatts nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WHNR may continue to operate with an emergency nondirectional antenna and reduced power not to exceed 1.25 kilowatts daytime and 0.625 kilowatt nighttime. It will be necessary to further reduce power or cease operation if complaints of interference are received. GBECC must notify the Commission when licensed operation is restored.³ GBECC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **September 15, 2011**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller".

Charles N. Miller, Engineer
