Subject: RE: 20110310AAO

It is in fact analog ch 44. The channel and the specified channel didn't match originally. I notice they do now. The on line form would not allow channel 44. I was going to file separately for operation on channel 44.

I request that the application 20110310AAO be withdrawn and I will file again on the proper channel.

Thank you very much for your help in this matter.

Flash cut applications must be filed for the same channel as their analog facility. The subject application was filed for channel 43 while the analog facility channel is 44. This application must be withdrawn and another for the same channel can be submitted.
