Re: KWNW(FM), Crawfordsville, Arkansas
Facility Identification Number: 51855
Capstar TX LLC
Special Temporary Authorization

Dear Mr. Langham:

This is in reference to the request filed May 6, 2011, on behalf of Capstar TX LLC ("Capstar"). Capstar requests special temporary authority ("STA") to operate Station KWNW with emergency antenna facilities pursuant to Section 73.1680.¹

In support of the request, Capstar states that it had to abandon its permit site due to flooding of the Mississippi River. Capstar states that it has restored service using an existing emergency antenna which is installed on one of the towers of Station WMFS(AM).

Section 73.1680 of the Commission's rules provides for operation with emergency antenna facilities following damage to authorized antenna systems, provided that an informal request for continued use of an emergency antenna is filed with the Commission within 24 hours. In particular, Section 73.1680(b)(2) provides that FM and TV stations may erect any suitable radiator, or use operable sections of the authorized antenna(s) as an emergency antenna.

STA requests which involve a change in transmitter site must include four critical elements: (1) Loss of the licensed site must be beyond the licensee's control; (2) STA facilities must continue

¹ Station KWNW is licensed to Jonesboro, Arkansas, for operation on Channel 270C (101.9 MHz) with effective radiated power ("ERP") of 100 kilowatts (H&V), and antenna height above average terrain ("HAAT") of 323 meters. Construction Permit BMPH-20090605ABY authorizes relocation of the station to Crawfordsville, relocation of the transmitter, a downgrade to Class C3 and operation with ERP of 8.5 kW and HAAT of 147 meters. Application BLH-20100910ACA, for license to cover the permit, is pending. Thus, the permit facilities are considered the licensed facilities for STA purposes.

to provide service² to the licensed community; (3) STA facilities must maintain, as closely as practicable, the licensed service area³ without extending it; (4) STA facilities cannot involve the construction of towers intended for permanent use by the station requesting the STA.

Our review indicates that the proposed STA operation complies with Section 73.1680 as well as with the foregoing criteria.

Accordingly, the request for STA IS HEREBY GRANTED. Station KWNW may continue to operate with the following facilities:

Geographic coordinates:	35° 13' 25" N, 90° 02' 33" W (NAD 1927)
Channel	270 (101.9 MHz)
Effective radiated power:	2.85 kilowatts (H&V)
Antenna height:	
above ground:	116 meters
above mean sea level:	190 meters
above average terrain:	116 meters

Capstar must notify the Commission when licensed operation is restored. Capstar must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **August 9, 2011**.

STA Advisory: Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

² For AM - 5 mV/m; for commercial FM - 3.16 mV/m; for noncommercial educational FM - 1.0 mV/m.

³ For AM - 0.5 mV/m contour; for FM - 1.0 mV/m contour.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.
