Re: KIID(AM), Sacramento, California

Facility Identification Number: 65482

Radio Disney Sacramento, LLC Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed February 24, 2011, on behalf of Radio Disney Sacramento, LLC ("RDS"). RDS seeks further extension of the special temporary authority ("STA") granted on July 17, 2009, to operate Station KIID with an emergency nondirectional antenna and reduced power. In support of the request, RDS provides a report of its progress toward restoring licensed operation since two of the station's towers and associated equipment were destroyed by a fire. RDS states that it has applied for and been granted a construction permit for the slightly modified directional array and that replacement towers and tuning equipment have been ordered. RDS further states that it is in discussions with the FCC staff regarding a field strength measurement condition on its permit.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoration of

¹ KIID is licensed for operation on 1470 kHz with 5 kilowatts daytime and 1 kilowatt nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U). Construction Permit BP-20100901ACW authorizes modifications to the daytime and nighttime directional patterns.

licensed operation. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KIID may continue to operate with an emergency nondirectional antenna and reduced power not to exceed 1.25 kilowatts daytime and 0.25 kilowatt nighttime. It will be necessary to further reduce power or cease operation if complaints of interference are received. RDS must notify the Commission when licensed operation is restored.² RDS must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on November 11, 2011.

Sincerely,

Charles N. Miller, Engineer
