Re: KCAL (AM), Redlands, California
Facility Identification Number: 55416
Lazer Licenses, LLC
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed March 2, 2011, on behalf of Lazer Licenses, LLC ("LLL"). LLL requests further extension of the special temporary authority ("STA") granted on June 21, 2006, to operate Station KCAL during nighttime hours with parameters at variance and/or reduced power while maintaining monitor points within licensed limits.¹ In support of the request, LLL states that concerns about obtaining the necessary local approvals to construct the facilities authorized by Construction Permit BP-20090909AAF led to cancellation of the permit. LLL states that it has filed a new application to relocate the transmitter to the site of Station KKDD, and that it would be wasteful to expend more resources on the soon-to-be abandoned KCAL nighttime antenna system.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ KCAL is licensed for operation on 1410 kHz with 5 kilowatts daytime and 4 kilowatts nighttime, employing separate daytime and nighttime transmitter sites and employing a directional antenna during nighttime hours only (DA-N-U). Application BP-20110215AES proposes relocating the daytime and nighttime transmitters to a common site and operation with 3 kilowatts daytime and 2.2 kilowatts nighttime, employing different directional patterns day and night (DA-2-U).

Our review indicates that Application BP-20110215AES remains pending; thus, the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted to allow time processing and implementation of its application.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KCAL may continue to operate during nighttime hours with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. LLL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 12, 2011**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller".
