Re: Multicultural Radio Broadcasting Licensee, LLC
KSJX (AM), San Jose, California
Facility Identification Number: 4118
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed April 15, 2011, on behalf of Multicultural Radio Broadcasting Licensee, LLC ("MRB"). MRB requests extension of the special temporary authority ("STA") granted on October 18, 2010, to operate Station KSJX with emergency antenna facilities pursuant to Section 73.1680.¹ In support of the request, MRB states that, following the destruction of the KSJX offices, studios and transmitter building by fire, it has made substantial progress toward reconstruction of its facilities; however, additional time is required for completion of the work.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

¹ KSJX is licensed for operation on 1500 kHz with 10 kilowatts daytime and 5 kilowatts nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KSJX may continue to operate with an emergency nondirectional antenna and reduced power not to exceed 2.5 kilowatts daytime and 1.25 kilowatts nighttime. It will be necessary to further reduce power or cease operation if complaints of interference are received. MRB must notify the Commission when licensed operation is restored.² MRB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 8, 2011**.

Sincerely,

Charles N. Miller, Engineer
