Re: Entravision Holdings, LLC

KGOL (AM), Humble, Texas

Facility Identification Number: 34473

Special Temporary Authority

Dear Counsel:

This is in reference to the request filed April 20, 2011, on behalf of Entravision Holdings, LLC ("EHL"). EHL requests extension of the special temporary authority ("STA") granted on October 20, 2010, to operate Station KGOL during nighttime hours with the licensed daytime pattern and reduced power of 250 watts. In support of the request, EHL states that construction of modified facilities authorized by Construction Permit BP-19870331BS (See Note 1, below) is nearing completion, and that it expects to file an application for license soon.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond
 the licensee's control, and the licensee has taken all possible steps to expeditiously resolve
 the problem.

Our review indicates that the licensee has made substantial progress toward restoring licensed operation. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KGOL may continue to operate during nighttime hours with the licensed daytime directional pattern, and

¹ KGOL is licensed for operation on 1180 kHz with 50 kilowatts daytime and 1 kilowatt nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U). Construction Permit BP-19870331BS authorizes an increase in nighttime power to 3 kilowatts and changes to the nighttime directional pattern.

reduced nominal operating power not to exceed 0.25 kilowatt. It will be necessary to further reduce power or cease operation if complaints of interference are received. EHL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on December 14, 2011.

Sincerely,

Charles N. Miller, Engineer
