Re: KCAD (FM), Dickinson, North Dakota  
Facility Identification Number: 57740  
CC Licenses, LLC  
Special Temporary Authorization

Dear Mr. Langham:

This is in reference to the request filed June 7, 2011, on behalf of CC Licenses, LLC ("CCL"). CCL requests special temporary authority ("STA") to operate Station KCAD with emergency antenna facilities pursuant to Section 73.1680.<sup>1</sup> In support of the request, CCL states that the licensed tower has collapsed and that Station KCAD is operating with reduced power and antenna height using an emergency vertically-polarized antenna mounted on a crank-up tower. CCL requests STA for continued use of the emergency antenna.

Section 73.1680 of the Commission's rules provides for operation with emergency antenna facilities following damage to authorized antenna systems, provided that an informal request for continued use of an emergency antenna is filed with the Commission within 24 hours. In particular, Section 73.1680(b)(2) provides that FM and TV stations may erect any suitable radiator, or use operable sections of the authorized antenna(s) as an emergency antenna. Our review indicates that the proposed STA operation complies with Section 73.1680.

Accordingly, the request for STA IS HEREBY GRANTED. Station KCAD may continue to operate with emergency antenna facilities as described above. CCL must notify the Commission when licensed operation is restored. CCL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 13, 2011**.

**STA Advisory:** Section 309(f) of the Communications Act of 1934, as amended, authorizes the

---

<sup>1</sup> KCAD is licensed for operation on Channel 256C1 (99.1 MHz) with effective radiated power of 100 kilowatts (H&V) and antenna height above average terrain of 242 meters.

Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
