Re: Mercer County Community College  
WWCJ(FM), Cape May, New Jersey  
Facility Identification Number: 41201  
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed June 8, 2011, on behalf of Mercer County Community College ("MCCC"). MCCC requests extension of the special temporary authority ("STA") granted on February 9, 2011, to operate Station WWCJ with temporary facilities.<sup>1</sup> In support of the request, MCCC states that it has filed for and been granted a construction permit to relocate the transmitter (*See* Note 1, below). MCCC requests extension of STA in order to allow time to construct the newly authorized, modified facilities.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoring licensed operation. Thus, extension of STA is warranted.

---

<sup>1</sup> WWCJ is licensed for operation on Channel 206B1 (89.1 MHz) with effective radiated power ("ERP") of 15 kilowatts (Max-DA, H&V) and antenna height above average terrain ("HAAT") of 94 meters. Construction Permit BPED-20110502ACO authorizes relocation of the transmitter, a reduction in the horizontally polarized ERP to 10 kilowatts, an increase in HAAT to 114 meters and changes to the directional antenna pattern.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WW CJ may continue to operate with the following facilities:

Geographic coordinates:	39° 07' 32" N, 74° 49' 27" W (NAD 1927)
Channel	206 (89.1 MHz)
Effective radiated power:	0.228 kilowatt (H&V)
Antenna type:	Nondirectional
Antenna height:	
above ground:	78 meters
above mean sea level:	83 meters
above average terrain:	80 meters

It is anticipated that an application for license to cover the construction permit will be filed prior to the expiration date below. MCCC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **February 4, 2012**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
