Re: Oregon Public Broadcasting

K219FJ (FX), Gleneden Beach, Oregon Facility Identification Number: 50615 Special Temporary Authority

Dear Counsel:

This is in reference to the request filed June 22, 2011, on behalf of Oregon Public Broadcasting ("OPB"). OPB requests further extension of the special temporary authority ("STA") granted on May 12, 2009, to operate FM Translator K219FJ with temporary facilities. In support of the request, OPB states that it continues to evaluate modification of the translator's facilities, that it has done considerable engineering and site survey work, but that its evaluation was dependent on the outcome of a group of mutually exclusive applications covering an extensive part of the area. OPB states that a grant has been made in the group, and requests extension of STA in order to complete its evaluation.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem.

¹ K219FJ is licensed for operation on Channel 219D (91.7 MHz) with effective radiated power of 0.205 kilowatt (H&V) and antenna height above average terrain of 20 meters.

Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station K219FJ may continue to operate with the following facilities:

Geographic coordinates:

44° 53′ 8″ N, 124° 0′ 51″ W (NAD 1927)

Channel

219 (91.7 MHz)

Effective radiated power:

0.012 kilowatt (H&V)

Antenna height:

above ground:

9 meters

above mean sea level:

96 meters

Above average terrain:

5 meters

OPB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on February 8, 2012.

Sincerely,

Charles N. Miller, Engineer

Audio Division Media Bureau
