Program Test Authority

Dear Applicant:

The staff has under consideration the request for program test authority and the license application filed July 29, 2011 to cover permit BNPED-20071017AEB. The PTA request included exhibits demonstrating compliance with special operating conditions regarding the directional antenna.

A review of WULV's request for program test authority reveals that the facilities were constructed pursuant to the terms and conditions of Construction Permit BNPED-20071017AEB, and the provisions of 47 C.F.R. § 73.1690(c)(2). Accordingly, Program Test Authority IS HEREBY GRANTED to commence operation pending further action on WULV's license application. The effective radiated power is 3.0 kilowatts (H&V) and the transmitter power output is 1.7 kilowatts.

Sincerely,

Rodolfo F. Bonacci
Assistant Chief
Audio Division
