Re: Radio Cantico Nuevo, Inc.
WNYG(AM), Medford, New York
Facility Identification Number: 5208
Construction Permit BP-20070601BDE
as modified by BMP-20110513AEK
License Application: BL-20110901ACW
Program Test Authority

Dear Applicant:

This is in reference to the above-captioned application and to the request for program test authority.

Authority is granted WNYG(AM) to conduct daytime program tests in accordance with construction permit BP-20070601BDE as modified by BMP-20110513AEK and 47 C.F.R. §73.1620 to operate on 1440 kHz with a nominal daytime power of 1.0 kilowatt. Program tests are authorized with a daytime antenna input power of 1.0 kilowatt and an antenna input current of 3.54 amperes. This program test authorization will expire on March 31, 2012.

A preliminary engineering study of the application reveals that condition #5 was not satisfied. Specifically, the required "before" construction proof on WLIM(AM) was not done due to a component failure that necessitated repairs and the close expiration date of the construction permit. The "after" construction proof showed that array adjustment would be necessary due to the effects of the filter insertion and the position of the TCT sampling devices in the circuit. Accordingly, after the array is properly adjusted, WLIM(AM) needs to file an application for direct measure of power (FCC Form 302) along with a partial proof.

In addition, the spurious emission measurements sent in email to Susan Crawford on September 7, 2011, must be formally filed with the FCC.

Further action on the subject application will be withheld for thirty (30) days from the date of this letter in order to provide Radio Cantico Nuevo, Inc., an opportunity to file a curative amendment.

Failure to respond or file an amendment within this time period will result in the dismissal of the application pursuant to Section 73.3568 of the rules.

Sincerely,

Son Nguyen,
Supervisory Engineer
