Re: W50DU-D, Port Jervis, New York
BMPDTL-20110302ABT
Facility ID No. 167316

Dear Licensees:

On March 23, 2011, the Commission granted the above-referenced application for minor modification of station W50DU-D, Port Jervis, New York, licensed to Venture Technologies Group, LLC ("VTG"). Renard Communications Corp. ("Renard"), the permittee of station WBQM-LD, channel 50, Brooklyn, New York, filed a timely petition for reconsideration arguing, *inter alia*, that VTG's filing of the application violated the terms of an April 10, 2009 settlement agreement filed with the Commission in order to resolve objections which Renard had filed against VTG applications. The Commission has no record of receiving a response to Renard's petition for reconsideration.

In view of the foregoing, the petition for reconsideration IS GRANTED in part, the grant of the above-referenced application IS RESCINDED, and VTG is directed to file a response to Renard's petition for reconsideration within 15 days of the date of this letter.

Sincerely,

Hossein Hashemzadeh
Deputy Chief, Video Division
Media Bureau
