Re: KNYN (FM), Ft. Bridger, Wyoming  
Facility Identification Number: 87470  
M. Kent Frandsen  
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed July 6, 2011, on behalf of M. Kent Frandsen ("MKF"). MKF requests further extension of the special temporary authority ("STA") granted on December 7, 2005, to operate Station KNYN with emergency antenna facilities pursuant to Section 73.1680.<sup>1</sup> In support of the request, MKF states that, following the collapse of the station's tower in an ice storm, the site owner has not yet reconstructed a stable replacement tower. MKF states that the site recently was sold and that he is coordinating with the new owner regarding plans to replace the tower, and that he is exploring other options for relocating the station.

We note that the previous STA expired on February 11, 2011. Our review indicates that the circumstances presented warrant grant of STA in order to provide for service to the public, and that the requested STA facilities are the same as were previously authorized. However, in light of the lapse of time between the expiration of the prior STA and the filing of the instant request, it will be considered as a request for a new STA; the authority granted will not cover the period between the expiration of the prior STA and the filing of the instant request.

Accordingly, the request for STA IS HEREBY GRANTED. Station KNYN may operate with the following facilities:

Geographic coordinates:	41° 21' 10"N, 110° 54' 26" W (NAD 1927)
Channel	256 (99.1 MHz)
Effective radiated power:	0.625 kilowatt (H&V)
Antenna height:	
above ground:	5 meters

---

<sup>1</sup> Station KNYN is licensed for operation on Channel 256C1 (99.1 MHz) with effective radiated power ("ERP") of 27.5 kilowatts (H&V), and antenna height above average terrain ("HAAT") of 489 meters. Construction Permit BPH-20070119AEV authorizes relocation of the transmitter and operation with 34 kW ERP (H only) and 453 meters HAAT.

above mean sea level: 2629 meters  
above average terrain: 456 meters

MKF must notify the Commission when licensed operation is restored. MKF must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. The authority granted herein does not cover the period between February 11, 2011, and July 6, 2011, and is without prejudice as to whatever action the Commission may take with respect to operation of Station KNYN during the foregoing period.

This authority expires on **April 4, 2012**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
