Re: WNTM (AM), Mobile, Alabama  
Facility Identification Number: 8695  
CC Licenses, LLC  
Special Temporary Authority

Dear Mr. Langham:

This is in reference to the request filed August 1, 2011, on behalf of CC Licenses, LLC ("CCL"). CCL requests further extension of the special temporary authority ("STA") granted on October 18, 2005, to operate Station WNTM with emergency antenna facilities pursuant to Section 73.1680.<sup>1</sup> In support of the request, CCL provides a report of its progress toward restoration of licensed operation. CCL states that it has discovered that the coordinates of the towers need correction, and that it has begun the process with the FAA.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WNTM may operate during nighttime hours with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. Operation with an emergency nondirectional antenna and reduced power not to exceed 0.25 kilowatt also is authorized, only as necessary to

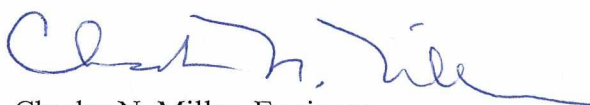

---

<sup>1</sup> WNTM is licensed for operation on 710 kHz with 1 kilowatt daytime and 1 kilowatt nighttime, employing a directional antenna during nighttime hours only (DA-N-U).

facilitate completion of the repair work. Following completion of necessary repairs, sampling system measurements and adjustments, operation is authorized with the substantially adjusted nighttime directional pattern. During this mode of operation, operating parameters shall be maintained within  $\pm 5\%$  current ratios and  $\pm 3^\circ$  phase indications of the MOM-derived operating parameters, which must be posted with the station's license along with a copy of this letter. It will be necessary to further reduce power or cease operation if complaints of interference are received. CCL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See 47 CFR § 1.1310.*

This authority expires on **April 17, 2012**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
