Re: Capstar TX Limited Partnership  
WERC (AM), Birmingham, Alabama  
Facility Identification Number: 2112  
Special Temporary Authority

Dear Mr. Langham:

This is in reference to the request filed July 29, 2011, on behalf of Capstar TX Limited Partnership ("Capstar"). Capstar requests further extension of the special temporary authority ("STA") granted on May 28, 2009, to operate Station WERC with parameters at variance and/or reduced power while maintaining monitor points within licensed limits, and with a nondirectional antenna and reduced power.<sup>1</sup> In support of the request, Capstar states that its MOM proof is largely complete, and that finalization and filing are anticipated soon.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted. The STA is modified based on the information provided.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WERC may

---

<sup>1</sup> WERC is licensed for operation on 960 kHz with 5 kilowatts daytime and 5 kilowatts nighttime, employing a directional antenna during nighttime hours only (DA-N-U).

continue to operate with its substantially adjusted nighttime directional pattern. During this mode of operation, operating parameters shall be maintained within  $\pm 3^\circ$  phase indications and  $\pm 5\%$  current ratios of the MOM-derived operating parameters, which shall be posted with the station license along with a copy of this letter. It will be necessary to further reduce power or cease operation if complaints of interference are received. Capstar must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **April 17, 2012**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with a long horizontal stroke at the end.

Charles N. Miller, Engineer
