In re: W265BO, York, AL
BPFT-20110928ALA
Facility ID # 151004

Dear Applicant:

This refers to the above-captioned application for a FM translator W265BO, York, Alabama.

An engineering study of the application reveals that it is in violation of 47 C.F.R. § 74.1235 (b)(1) since the 60 dBu service contour of the proposed translator is not within the 60 dBu protected contour of primary station WQST-FM¹, Forest, Mississippi.

In addition, the application proposes an effective radiated power ("ERP") of 250 watts. Section 74.1235(b)(1) states that the maximum allowable effective radiated power with an antenna height above average terrain (HAAT) between 40 meters and 47 meters is 120 watts. Our study reveals that the azimuth at 90° has a HAAT of 42 meters. The application failed to discuss this violation. Therefore, we will dismiss the application.

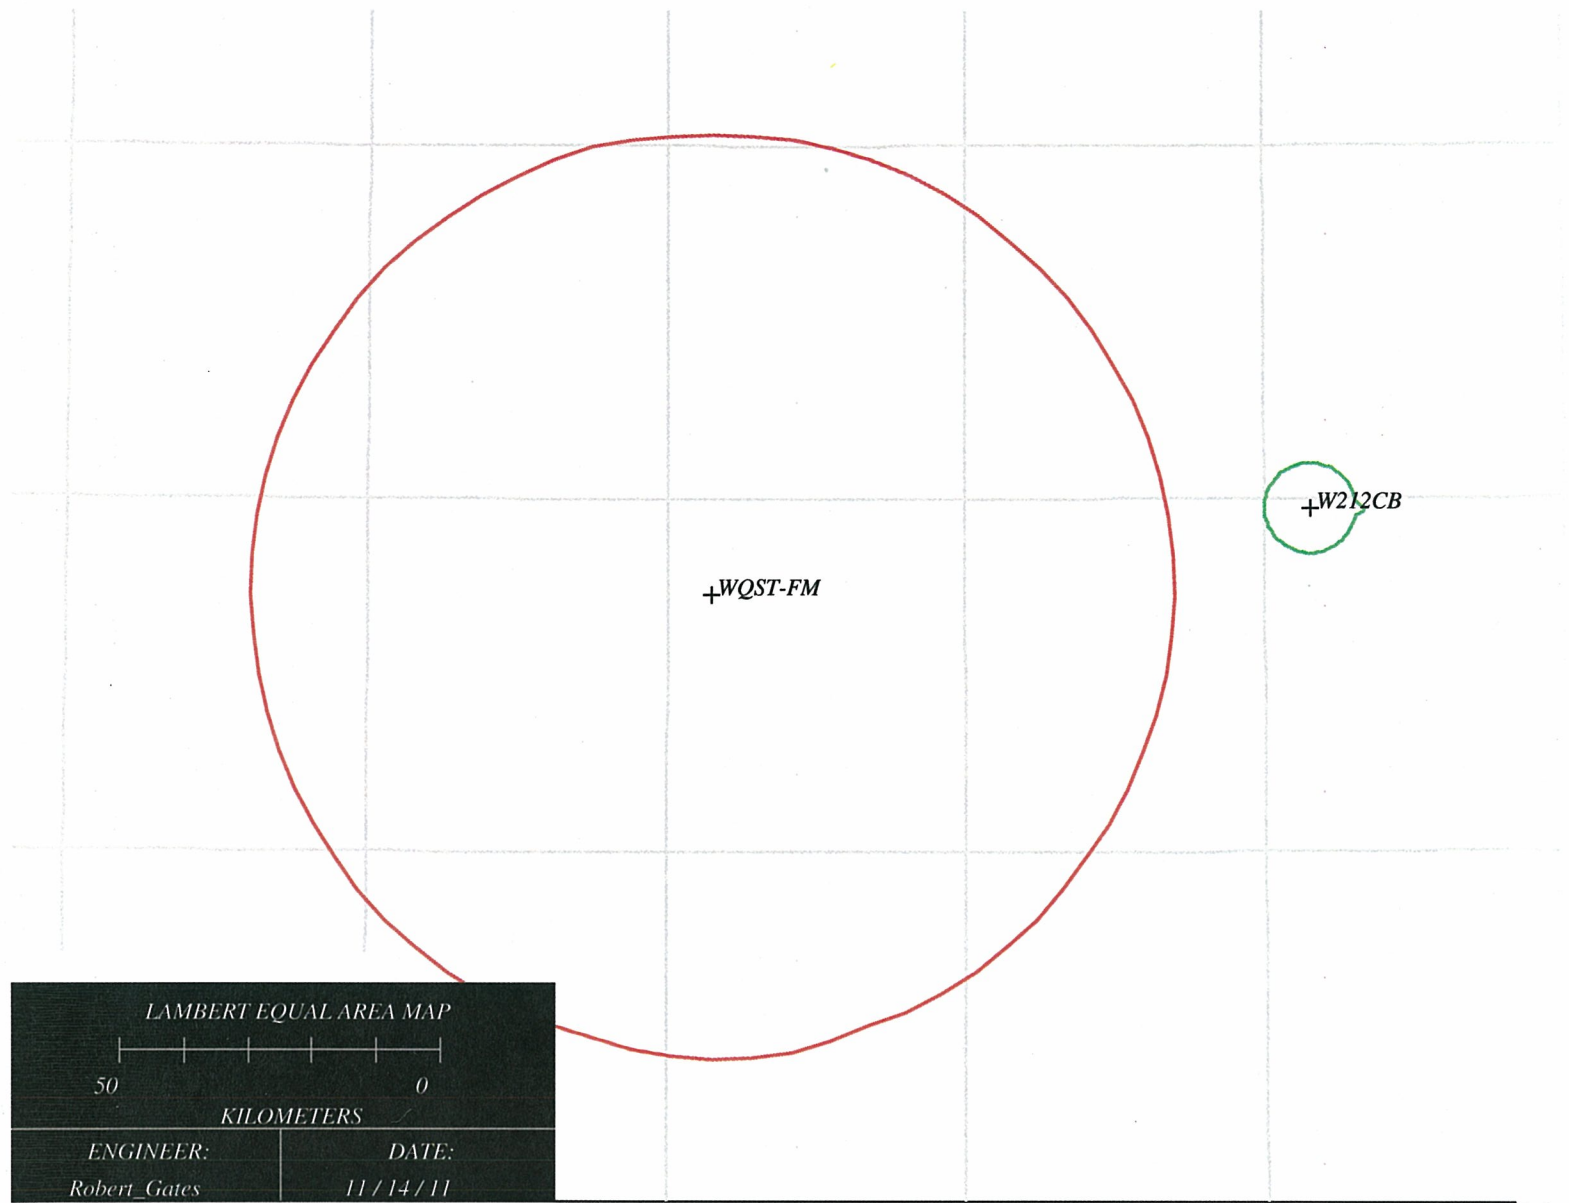

In light of the above, Application BPFT-20110928ALA is unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283.

Sincerely,

James D. Bradshaw
Associate Chief
Audio Division
Media Bureau

¹ The proposed translator's 60 dBu is not fully encompassed by 60 dBu contour of WQST-FM, BMLED-19941021KZ.

No topographic data is available for this location.

A1 - Number of radials where free space equation was used for field strength calculations.

A7 - Number of radials where a HAAT less than 30 meters was adjusted to 30 meters.
