Re: BMP RGV License Company, LP
KJAV(FM), Alamo, Texas
Facility Identification Number: 51957
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed November 15, 2011, on behalf of BMP RGV License Company, LP ("BRL"). BRL requests modification of the special temporary authority ("STA") granted on September 16, 2011, to operate Station KJAV with temporary facilities.¹ In support of the previous request, BRL stated that the currently licensed tower requires structural repairs and may be replaced. In support of the instant request for modification of STA, BRL states that it is not possible to use the site originally requested.

STA requests which involve a change in transmitter site must include four critical elements: (1) Loss of the licensed site must be beyond the licensee's control; (2) STA facilities must continue to provide service² to the licensed community; (3) STA facilities must maintain, as closely as practicable, the licensed service area³ without extending it; (4) STA facilities cannot involve the construction of towers intended for permanent use by the station requesting the STA. Our review indicates that the proposed, modified STA operation complies with the foregoing criteria.

Accordingly, the request for modification of STA IS HEREBY GRANTED. Station KJAV may operate with the following facilities:

Geographic coordinates: 26° 18' 56" N, 98° 06' 16" W (NAD 1927)⁴

¹ KJAV is licensed for operation on Channel 285A (104.9 MHz) with effective radiated power of 6 kilowatts (Max-DA, H&V) and antenna height above average terrain of 99 meters.

² For AM - 5 mV/m; for commercial FM - 3.16 mV/m; for noncommercial educational FM - 1.0 mV/m.

³ For AM - 0.5 mV/m contour; for FM - 1.0 mV/m contour.

⁴ The proposed tower is one of the two daytime-only towers in the array of commonly-owned Station KVJY(AM). KVJY has been granted STA for daytime operation with its nighttime pattern during repairs to one of its daytime towers.

Channel	285 (104.9 MHz)
Effective radiated power:	0.8 kilowatt (H&V)
Antenna height:	
above ground:	82 meters
above mean sea level:	106 meters
above average terrain:	84 meters

BRL must notify the Commission when licensed operation is restored. BRL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **May 16, 2012**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.
