License application BL-20111017AWB
BP-20090711ASD (Construction Permit)
Program Test Authority

Dear Mr. Blanco Pi:

This is in reference to the above-captioned license application to cover Construction Permit BP-20090711ASD to change the nighttime directional antenna pattern, and the request for program test authority.

A preliminary review of the application indicates that the antenna ground system was changed from a standard ground system to an elevated counterpoise system without prior authorization. As a result, a minor change application (FCC Form 301) application containing a new RF and environmental statement must be filed. In addition, we find that the sample current ratio value for tower #2 on FCC Form 302 page 4 must be corrected to 0.55, and that the 280° tabulation page should be amended to remove point #1 (0.5 km) because no measured values were provided.

Accordingly, the request for program test authority is DENIED. Further action on this application will be withheld for thirty (30) days to allow time to file the 301 application, and amend the application. Failure to amend or respond will result in the dismissal of the application pursuant to Section 73.3568 of the Commission's Rules.

Sincerely,

Son Nguyen
