Re: WSYY-FM, Millinocket, Maine
Facility Identification Number: 33470
Katahdin Communications, Inc.
Special Temporary Authorization

Dear Mr. Talbott:

This is in reference to the request filed October 5, 2011, on behalf of Katahdin Communications, Inc. ("KCI"). KCI requests further extension of the special temporary authority ("STA") granted on November 7, 2007, to operate Station WSYY-FM with temporary facilities.¹ In support of the request, KCI states that, following the loss of its licensed site, it continues to search for a new, permanent site for the station.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WSYY-FM may continue to operate with the following facilities:

Geographic coordinates: 45° 50' 26" N, 68° 43' 12" W (NAD 1927)
Channel 235 (94.9 MHz)
Effective radiated power: 12 kilowatts (H&V)

¹ WSYY-FM is licensed for operation on Channel 235C2 (94.9 MHz) with effective radiated power of 25 kilowatts (H&V) and antenna height above average terrain of 211 meters.

Antenna height:
above ground: 83 meters
above mean sea level: 211 meters
Above average terrain: 68 meters

KCI must notify the Commission when licensed operation is restored. KCI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **May 23, 2012**.

Sincerely,

Charles N. Miller, Engineer
