Re: Capstar TX LLC
WTXT(FM), Fayette, Alabama
Facility Identification Number: 68418
Special Temporary Authority

Dear Mr. Langham:

This is in reference to the request filed November 3, 2011, on behalf of Capstar TX LLC ("Capstar"). Capstar requests extension of the special temporary authority ("STA") granted on May 5, 2011, to operate Station WTXT with temporary facilities.¹ In support of the request, Capstar states that the licensed tower was felled by storms on April 27, 2011. Capstar states that continues to negotiate with the site owner to resolve lease issues so that the tower can be replaced.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WTXT may continue to operate with the following facilities:

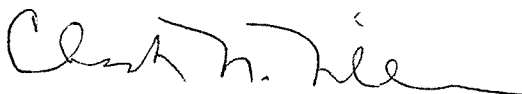

¹ WTXT is licensed for operation on Channel 251C1 (98.1 MHz) with effective radiated power of 100 kilowatts (H&V) and antenna height above average terrain of 276 meters.

Geographic coordinates: 33° 10' 30" N, 87° 33' 18" W (NAD 1927)
Channel 251 (98.1 MHz)
Effective radiated power: 5.7 kilowatts (H&V)
Antenna height:
 above ground: 119 meters
 above mean sea level: 166 meters
 above average terrain: 97 meters

Capstar must notify the Commission when licensed operation is restored. Capstar must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **June 20, 2012**.

Sincerely,

Charles N. Miller, Engineer
