Subject: Denton TV Association

Gentlemen: Regarding the Denton TV Association request for Analog and Digital STAs.

The applicant requests analog STAs to maintain their analog operation until they can purchase and install digital equipment. They are also requesting digital STA's to be assured that they may continue their service to the community with a digital signal. They anticipate it will take up to 120 days to purchase and install the new digital equipment. At the time they install the digital equipment they will cease analog operation.
