Re: KJMQ (FM), Lihue, Hawaii
Facility Identification Number: 49898
Hochman Hawaii Four, Inc.
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed January 30, 2012, on behalf of Hochman Hawaii Four, Inc. ("HHFI"). HHFI requests further extension of the special temporary authority ("STA") granted on December 3, 2009, to operate Station KJMQ with temporary facilities.¹ In support of the request, HHFI states that completion of authorized facilities for co-located Stations KJMQ, KJMQ and KJMQ has been delayed by lack of adequate electrical power at the transmitter site. HHFI states that it has filed applications for modification of construction permit to reduce the power of the three stations.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to resolve the problem. We note that Construction Permit BPH-20120130AKZ was granted on February 29, 2012; thus, extension of STA is warranted to allow time for construction of the newly authorized, modified facilities.

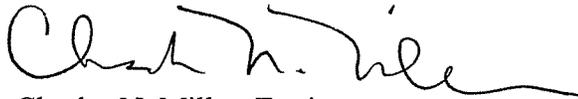

¹ KJMQ is licensed for operation on Channel 251C1 (98.1 MHz) with effective radiated power ("ERP") of 51 kW (H&V) and antenna height above average terrain ("HAAT") of 4 meters. Construction Permit BPH-20120130AKZ authorizes relocation of the transmitter and operation with ERP of 0.45 kW (H&V) and HAAT of 510 meters.

Based on the results of our review, the STA is modified to reflect the file number of the new permit.

Accordingly, the request for extension of STA IS HEREBY GRANTED, with modification as discussed above. Station KJMQ may continue to operate from the site authorized by Construction Permit BPH-20120130AKZ, employing a temporary antenna with antenna height and effective radiated power less than the permit values. HHFI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **October 2, 2012**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with a long horizontal stroke at the end.
