Re: Citicasters Licenses, Inc.  
KIIS-FM, Los Angeles, California  
Facility Identification Number: 19218  
Special Temporary Authority

Dear Mr. Langham:

This is in reference to the request filed May 3, 2012, on behalf of Citicasters Licenses, Inc. ("Citicasters"). Citicasters requests special temporary authority ("STA") to test a planned FM Booster associated with Station KIIS-FM.<sup>1</sup> In support of the request, Citicasters states that it plans to conduct a test to determine whether an operating power exists which will provide benefit to the station while minimizing self-interference.<sup>2</sup>

Our review indicates that the proposed STA operation will not result in extension of the proposed 54 dBu F(50,50) contour beyond the corresponding contour of the host station and that no interference to any other station is likely to occur.

Accordingly, the request for STA IS HEREBY GRANTED. Station KIIS-FM may operate a temporary FM Booster with the following facilities:

Geographic coordinates:	34° 23' 46" N, 118° 29' 22" W (NAD 1927)
Channel	274 (102.7 MHz)
Effective radiated power:	Not to exceed 1.0 kilowatt (Max-DA, V only)
Antenna manufacturer and type:	Scala, model CL-FM, directional
Antenna orientation:	325° True
Antenna height:	
above ground:	15 meters
above mean sea level:	557 meters
above average terrain:	-2 meters

---

<sup>1</sup> KIIS-FM is licensed for operation on Channel 274B (102.7 MHz) with effective radiated power of 8.0 kilowatts (H&V) and antenna height above average terrain of 902 meters.

<sup>2</sup> Similar requests were filed by Stations KIIS-FM, KOST, KHHT and KBIG-FM. Although the requests were styled as for a "share-time" facility, each must be studied separately within the spectrum environment of its host station. Separate letters of authorization are being issued to each station; it will be left to the various stations to coordinate the operation of the test facility.

Citicasters must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **August 9, 2012**.

**STA Advisory:** Section 309(f) of the Communications Act of 1934, as amended, authorizes the Commission to grant STA in cases of "extraordinary circumstances requiring temporary authorizations in the public interest and when delay in the institution of the temporary operations would seriously prejudice the public interest." However, Section 309(f) is not a means by which a licensee/permittee may circumvent established processing procedures which require the filing of an application, nor is it a means by which a broadcaster may enhance his facility or make operation more convenient for the broadcaster. Stations operating with less than licensed facilities under temporary authorities can be viewed as receiving the benefit of a larger protection area than that in which they are currently providing service.

Accordingly, Special Temporary Authorities by nature are to be temporary and are not intended for extended use. Licensees of stations operating under temporary authorities are reminded that timely restoration of permanent facilities is the responsibility of the licensee and should be undertaken expeditiously. Any request for extension of special temporary authorities carries an increased burden with each subsequent request.

Therefore, requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Sincerely,

Charles N. Miller, Engineer  
Audio Division  
Media Bureau
