Re: KNYN (FM), Ft. Bridger, Wyoming
Facility Identification Number: 87470
M. Kent Frandsen
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed April 3, 2012, on behalf of M. Kent Frandsen ("MKF"). MKF requests further extension of the special temporary authority ("STA") granted on December 7, 2005, to operate Station KNYN with emergency antenna facilities pursuant to Section 73.1680.¹ In support of the request, MKF states that, following the collapse of the station's tower in an ice storm, the site owner has not yet reconstructed a stable replacement tower. MKF states that the site recently was sold, that he is coordinating with the new owner regarding plans to replace the tower and that he also is exploring other options for relocating the station.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KNYN may

¹ Station KNYN is licensed for operation on Channel 256C1 (99.1 MHz) with effective radiated power ("ERP") of 27.5 kilowatts (H&V), and antenna height above average terrain ("HAAT") of 489 meters.

continue to operate with the following facilities:

Geographic coordinates:	41° 21' 10"N, 110° 54' 26" W (NAD 1927)
Channel	256 (99.1 MHz)
Effective radiated power:	0.625 kilowatt (H&V)
Antenna height:	
above ground:	5 meters
above mean sea level:	2629 meters
above average terrain:	456 meters

MKF must notify the Commission when licensed operation is restored. MKF must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 17, 2012**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.
