Re: WUNO(AM), San Juan, Puerto Rico

Facility Identification Number: 54476

Arso Radio Corporation

Special Temporary Authorization

## Dear Counsel:

This is in reference to the request filed April 30, 2012, on behalf of Arso Radio Corporation ("Arso"). Arso requests further extension of the special temporary authority (STA) granted on November 1, 2007, to operate Station WUNO¹ pursuant to Section 73.1615. In support of the request, Arso states that it has completed construction of modified facilities authorized by Construction Permit BP-20090121ADH, has filed an application for license and has requested Program Test Authority ("PTA").

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the request for PTA was denied by the staff on May 11, 2012 and that the license application remains pending; thus, the licensee has been prevented from restoring licensed operation due to causes beyond its control, and extension of STA is warranted to allow time for the filing of supplemental information requested by the staff.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WUNO may continue to operate pursuant to Section 73.1615 and the terms and conditions of Construction Permit BP-20090121ADH. In particular, the following modes of operation are authorized:

<sup>&</sup>lt;sup>1</sup> WUNO is licensed to operate on 630 kHz with 5 kilowatts, unlimited hours, employing the same directional antenna pattern daytime and nighttime (DA-1-U). Construction Permit BP-20090121ADH authorizes relocation of the transmitter and changes to the directional pattern.

- 1. With a nondirectional antenna and reduced power not to exceed 1.25 kilowatts, as necessary to facilitate the construction work and for nondirectional proof of performance measurements.
- 2. With the substantially adjusted directional antenna pattern authorized by the permit, and nominal power not to exceed 5 kilowatts.

It will be necessary to further reduce power or cease operation if complaints of interference are received. Arso must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on November 29, 2012.

Sincerely,

Charles N. Miller, Engineer
