Re: KUFO (AM), Portland, Oregon
Facility Identification Number: 26926
Alpha Licensee, LLC ("Alpha")
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed May 23, 2012, on behalf of Alpha Licensee, LLC ("Alpha") Alpha requests further extension of the special temporary authority ("STA") granted on January 23, 2009, to operate Station KUFO with parameters at variance and/or reduced power while maintaining monitor points within licensed limits.¹ In support of the request, Alpha states that it the problems with its transmitter and antenna system related to several nearby, tall towers have been resolved, that it is actively working to complete restoration of its directional antenna system and that it expects to complete a proof of performance in the near future.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made substantial progress toward restoring licensed operation; thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KUFO may

¹ KUFO is licensed for operation on 970 kHz with 5 kilowatts daytime and 5 kilowatts nighttime, employing a directional antenna during nighttime hours only (DA-N-U).

continue to operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. It will be necessary to further reduce power or cease operation if complaints of interference are received. Alpha must notify the Commission when licensed operation is restored.² Alpha must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 4, 2012**.

Sincerely,

Charles N. Miller, Engineer
