Re: Cox Radio, Inc.
WAGG (AM), Birmingham, Alabama
Facility Identification Number: 48717
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed June 7, 2012, on behalf of Cox Radio, Inc. ("CRI"). CRI requests extension of the special temporary authority ("STA") granted on May 4, 2011, to operate Station WAGG during nighttime hours with a temporary nondirectional antenna and reduced power.¹ In support of the request, CRI states that repairs to the station's antenna system are expected to take place within the next month, after which it will perform necessary measurements showing compliance with Construction Permit BP-20110829ABW.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WAGG may

¹ WAGG is licensed for operation on 610 kHz with 5 kilowatts daytime and 1 kilowatt nighttime, employing a directional antenna during nighttime hours only (DA-N-U). Construction Permit BP-20110829ABW authorizes a reduction in nighttime operating power to 0.61 kilowatts, nondirectional.

continue to operate during nighttime hours with a temporary nondirectional antenna and reduced power not to exceed 0.25 kilowatt. It will be necessary to further reduce power or cease operation if complaints of interference are received. CRI must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 11, 2012**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller".
