Re: GB Enterprises Communications Corporation
WHNR (AM), Cypress Gardens, Florida
Facility Identification Number: 21766
Special Temporary Authority

Dear Mr. Santos:

This is in reference to the request filed June 1, 2012, on behalf of GB Enterprises Communications Corporation ("GBECC"). GBECC requests further extension of the special temporary authority ("STA") granted on May 18, 2010, to operate Station WHNR with emergency antenna facilities pursuant to Section 73.1680.¹ In support of the request, GBECC states that one of the station's towers has fallen down and that access to the site has been limited by heavy rainfall and flooding. GBECC states that it expects to be able to resume repair efforts once the site dries out, and that it will work as diligently as possible to restore licensed operation.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control, and has taken all possible steps to resolve the problem. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WHNR may

¹ WHNR is licensed for operation on 1360 kHz with 5 kilowatts daytime and 2.5 kilowatts nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

continue to operate with an emergency nondirectional antenna and reduced power not to exceed 1.25 kilowatts daytime and 0.625 kilowatt nighttime. It will be necessary to further reduce power or cease operation if complaints of interference are received. GBECC must notify the Commission when licensed operation is restored.² GBECC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **December 8, 2012**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller".

Charles N. Miller, Engineer
