FACSIMILE: (202) 418-1410

Lazer Licenses, LLC

Special Temporary Authority

## Dear Counsel:

This is in reference to the request filed July 10, 2012, on behalf of Lazer Licenses, LLC ("LLL"). LLL requests further extension of the special temporary authority ("STA") granted on June 21, 2006, to operate Station KCAL during nighttime hours with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. In support of the request, LLL states that, following its decision to remain at the licensed nighttime site, restoration of the nighttime facility has not yet occurred due to conflicting time and financial commitments. LLL states that it expects the work to be completed by January, 2013.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates the licensee has made progress toward restoration of licensed operation but additional time is required for completion of the work; thus, extension of STA is warranted in order to allow time for completion of repairs to its equipment.

<sup>&</sup>lt;sup>1</sup> KCAL is licensed for operation on 1410 kHz with 5 kilowatts daytime and 4 kilowatts nighttime, employing separate daytime and nighttime transmitter sites and employing a directional antenna during nighttime hours only (DA-N-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KCAL may continue to operate during nighttime hours with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. LLL must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on January 30, 2013.

Sincerely,

Charles N. Miller, Engineer
