Ms. Jennifer Cox-Hensley, President  
Indiana Community Radio Corporation  
15 North Wood Street  
Greenfield, Indiana 46140

Re: WRFM (AM), Muncie, Indiana  
Facility Identification Number: 1724  
Indiana Community Radio Corporation  
Special Temporary Authorization

Dear Ms. Cox-Hensley:

This is in reference to the request filed September 4, 2012, on behalf of Indiana Community Radio Corporation (ICRC). ICRC requests further extension of the special temporary authority (STA) originally granted to former licensee Electronic Applications Radio Service ("EARS") on September 2, 1999, and modified on September 16, 2002, to operate Station WRFM (formerly WLHN) from a site other than the licensed site, with reduced power and employing a temporary, nondirectional antenna.<sup>1</sup> In support of the request, ICRC states that it has lost its licensed site and that no other location exists where the former array can be rebuilt, that it is pursuing options to relocate the facility but that it has not found a suitable location.

We note that the previous STA expired on June 13, 2012. Our review indicates that the circumstances presented warrant grant of STA in order to provide for service to the public, and that the requested STA facilities are the same as were previously authorized. However, in light of the lapse of time between the expiration of the prior STA and the filing of the instant request, it will be considered as a request for a new STA; the authority granted will not cover the period between the expiration of the prior STA and the filing of the instant request.

Accordingly, the request for STA IS HEREBY GRANTED. Station WRFM may operate with the following facilities:

Transmitter site	3908 W. 30th Street, Muncie, IN
Coordinates:	40° 09' 35" N, 85° 25' 55" W (NAD 1927)
Frequency:	990 kHz
Operating hours:	Unlimited

---

<sup>1</sup> WRFM is licensed for operation on 990 kHz with 0.250 kilowatt daytime and 0.001 kilowatt nighttime, employing different directional antenna patterns during daytime and nighttime hours. (DA-2-U).

Operating power: not to exceed 62 watts daytime, one watt nighttime  
Antenna: Existing tower, nondirectional (folded unipole)

It will be necessary to further reduce power or cease operation if complaints of interference are received. ICRC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310. The authority granted herein does not cover the period between June 13, 2012, and September 4, 2012, and is without prejudice as to whatever action the Commission may take with respect to operation of Station WRFM during the foregoing period.

This authority expires on **April 2, 2013**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller". The signature is fluid and cursive, with a large initial "C" and a long horizontal stroke at the end.

Charles N. Miller, Engineer
