Dear Applicant:

Within 30 days from the date of this letter, file an amendment to resolve the deficiency that was discovered during the initial review of your application. Amendments must be filed electronically. Failure to amend your application will result in the dismissal of the application.

Specifically, the application as referenced above proposes a tower height increase of 9.1 meters.

The Overall Tower Height Above Ground Level of the proposed construction permit is 182.8 meters; and the antenna registration search results of ASRN number 1022324 as indicated in the above referenced construction permit shows the Overall Tower Height Above Ground Level is 173.3 meters which equals a proposed tower height increase of 9.1 meters which will require notification and new tower registration with the FAA.

Sincerely
