Re: Notice of resumption of full power directional nighttime operation  
KZNE(AM) - College Station, TX  
Facility ID Number 7632

Gentlemen:

On October 9, 2012, KZNE(AM) requested special temporary authority (which was granted on October 12, 2012) pursuant to Section 73.1680(b)(1) of the FCC Rules, to continue operating with 125 watts nondirectional during nighttime hours (25% of the licensed nighttime directional power) because of the failure of the control system which switched between its licensed daytime nondirectional operation and its licensed nighttime directional operation. This letter provides notification that the repaired RF contactors were re-installed and KZNE resumed operation with its full licensed power of 1000 watts nondirectional day and 500 watts directional night on October 24, 2012.

Please feel free to contact the undersigned with any questions.

Sincerely,

Roy Stype
